

Abstract

The invention relates to a non-dusting homogeneous pigment preparation notable in that it comprises at
5 least 40% by weight of one or more effect pigments,
from 0.5 to 50% by weight of water and/or an organic solvent or solvent mixture and from 0.5 to 59.5% by weight of a styrene-modified polyacrylate resin having an acid number >90 mg KOH/g, and to its use to produce
10 dry preparations.
